### HI22000TMK TANDEM-DUMPER

Profiline  
(HI22000TMK)

This vehicle is designed for hardest strains.

Thanks the hard front and rear board panel the bridge is very stabile.

- Gross vehicle weight rating 22000 kg
- Bridge as hatch, side or rear tilting
- Left side board panel with double action cylinders  
(Side board panel is operated over the whole width and height hydraulic.)
- Rear board panel ca. 500 mm, pendulum
- Inside bridge width 2420 mm, inside bridge length 5000 mm, board panel height 1600 mm
- Board panels extra stabile, 3 mm sheet thickness with rectangular tube frame 120x60 mm
- 10-hole-axes (increased design)
- 2000 mm track gauge, tandem unit spring loaded, Axes for 105 km/h (without ABS till 60 km/h)
- ALB-controller (automatic load-dependent brake)
- Parabolic spring, 100 mm wide
- Central locking sidewise, operated automatically with side board panel
- Hydraulic skid leg support with protected double action cylinder with tractor connection
- Spring borne pulling tool, adjustable in height for above and below hitch
- Hydraulic locking and unlocking, block for dosed opening and save locking
- Ball-tilt-bearing Ø110 mm
- Grain outlet rear H300xW400, grain valve with arm
- Bottom 4 mm
- Ball head K80 (optional with drawbar eye, 20000 kg gross weight)
- Paintwork in 2-componenten PUR laminated hard paint
- Tire 385/65R22.5 (available also as wide-base-tire)
- Technical control board expertise for 40 km/h
- Different equipment by request

Technical changes reserved.
